

# Science Festival on the Streets of Jerez 2023

With open minds, science awakens

31 CENTRES 147 EXPERIMENTSS

The Science Fair on Calle de Jerez continues with its commitment to fostering scientific vocations in students and promote citizen participation in the scientific process. In the year 2023, the initiative adapts to the times and will be carried out in a hybrid format, combining research and experimentation in the classroom with online dissemination. The virtual platform will allow students to show their work and will be attended by research centers, companies in the field of science and technology, and other organizations. The Science Fair on Calle de Jerez continues to be an opportunity to develop teaching-learning models based on research and experimentation, and value the social and economic utility of science and technology.
